CONTENTS

Number 1/2

SPECIAL ISSUE
EXPLORING THE NATURE OF RESEARCH IN COMPUTER-RELATED APPLICATIONS IN EDUCATION

v Preface

Research for Describing, Understanding, Explaining

Wim Veen 1 How teachers use computers in instructional practice—four case studies in a Dutch secondary school

Deryn M. Watson 9 Classroom processes and geography simulations

Klaus-Henning Hansen 17 Teachers' choices of content and context in computer-education courses

Rachel Cohen 25 The use of voice synthesizer in the discovery of the written language by young children

Gillian Blissett and Madeleine Atkins 31 Are they thinking? Are they learning? A study of the use of interactive video

Margaret J. Cox 41 Technology enriched school project—the impact of Information Technology on children's learning

Action Research and Formative Evaluation: The Instrumentation/Implementation Loop

J. J. Beishuizen and J. Moonen 51 Technology-enriched schools: co-operation between teachers and researchers

Elisabeth van der Linden 61 Does feedback enhance computer-assisted language learning?

J. G. M. Jaspers, G. Kanselaar and W. A. M. Kok 67 Productive language use with *IT'S ENGLISH*

Thomas Lingefjärd 77 The use of computers in teaching mathematics—beliefs and misbeliefs

Pieter G. van Schaick Zillesen, Marcel H. Zwietering and Klaas van't Riet 89 Computer support of food and bioprocess engineering education

Hypothesis Testing and Causal Generalizations

A. G. Sciarone and P. J. Meijer 95 How free should students be? A case from CALL: computer-assisted language learning

B. Gerard Doornekamp 103 Students valuation of the use of computers in education

Jan J. Elshout, Marcel V. J. Veenman and Janet G. van Hell 115 Using the computer as a help tool during learning by doing

Plon. W. Verhagen 123 Formal features as a design factor of video segments in interactive video programmes

Rauf Yildiz and Madeleine Atkins 133 Evaluating multimedia applications

Willem J. Pelgum and Arjan T. Schipper 141 Indicators of computer integration in education

Reflective Meta-analyses and a Theoretical Framework

Betty Collis and Gerrit Carleer 151 The effects of technology-enriched school intervention: a multiple case-study analysis

Jef Moonen and Ivan Stanchev 163 Educational interactive systems research: instrumentation and implementation

R. Lewis 173 Learning technologies from a human actor's view

Jan Schoenmaker 181 Linking new applications to new design paradigms

Number 3

Rosemary H. Wild and MaryAnne Winniford 193 Remote collaboration among students using electronic mail

Rob Miller, Jon Ogborn, Jonathan Briggs, Derek Brough, Joan Bliss, Richard Boohan, Tim Brosnan, Harvey Mellar and Babis Sakonidis 205 Educational tools for computational modelling

L. Bellomonte and R. M. Sperandeo-Mineo 263 Mathematical modelling of data: software for pedagogy

Book Review 271

Number 4

Ronald H. Nowaczyk and April D. Snyder 273 Using hypertext for college course information

Pavol Návrat and Viera Rozinajová	281	Making programming knowledge explicit
Nancy Ruth Fox	301	CAI in the principles course: a second look
Philip Barker and Terry King	307	Evaluating interactive multimedia courseware—a methodology
Brian Wilson and Douglas Armstrong	321	A computerized system for school report and record writing
A. Durndell and P. Lightbody	331	Gender and computing: change over time?
F. Layne Wallace and Yap Siong Chua	337	Teaching computer music in a computer setting
